

..... *Providing Solutions, where
Systems must Achieve an Operational
Availability at a Minimal Life Cycle Cost*

Reliability Engineering

*FMEA, FMECA, Predictions, Modeling,
Reliability Block Diagrams, Mission Profiles,
Probability, RCM*

Maintainability Engineering

*Task Analysis, Predictions, Human Factors,
Testability, BIT, FD/ FI*

Safety Engineering

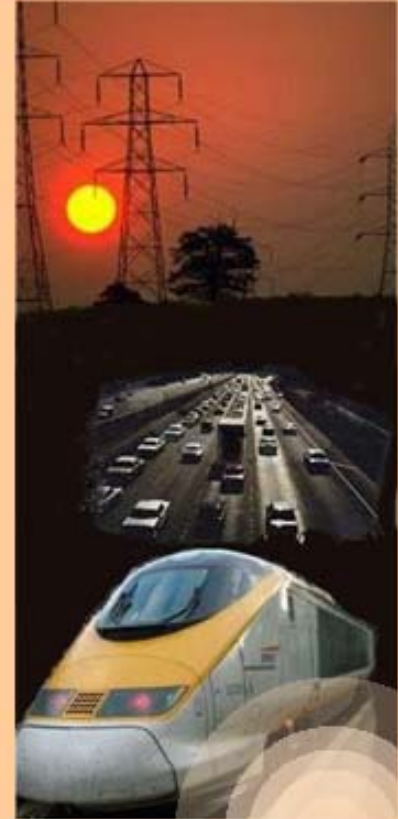

*FMECA, Fault Tree Analysis, Preliminary
Hazard Analysis, Hazard Analysis and Reporting*

Logistics Support Engineering

*LSA, ELORA, Spares Modeling, MTA,
Provisioning, PPB, LTIL, RSPL, SE*

Program Management Support

*Planning, WBS, Proposal Support, Procedures,
Program Strategies, Critical Task Scheduling*

Reliability, Maintainability, Safety, Logistics Support Engineering Services

MTain provides professional Reliability, Maintainability, Safety and Logistics Engineering Services to the Aerospace, Defence, Space, Transportation and Commercial Sectors of Industry.

MTain can support you in all phases of your products life cycle, from proposal development, through conceptual analysis, design, development or the acquisition of new systems.

MTain can provide to you critical support services. These services can range from assessing your product's Reliability & Maintainability characteristics, to developing critical Life Cycle Cost Support strategies.
